Personal Profile

I am a highly driven technology aficionado with a particular love of open source software and the web. I believe technology should make life simpler and more joyful, and I enjoy being able to prove so.

I've spent the last 8 years working in the web industry as a Developer, Sysadmin, Project manager, Account manager, Consultant and Business owner.

I have both worked for and consulted to a range of clients such as Allure Media (Kotaku/Lifehacker/Gizmodo), AMP, the Department of Defence, Adairs and Mattel to name a few.

I'm looking for a team with an exceptional product that would benefit from a highly skilled, easy going and passionate technical team member.

Skills summary

- Great lover of Ruby, PHP retiree. Presently working on side projects in Go and Bash
- Sysadmin especially Debian and Ubuntu, including Varnish, Apache and MySQL high performance setups to the tune of 1000's reqs/s
- A project without git is no project at all
- HTML, CSS, and Javascript (+Node.js) are a given. Angular is interesting and Meteor even more so
- I'm an open source contributor and enthusiast. I co-authored DuckOS, a tiny PaaS operating system for the Raspberry Pi
- I work most happily on Apple's OS X, use Linux via the shell daily and deal with Windows when I have to. Photoshop is a long-time friend

Characteristics

- Excellent communication skills, both written and verbal
- Effective in both team environments and individual work
- Adaptive to working in new environments and fast paced situations
- Aptitude for self-learning and taking on new tasks and technologies

History

Keepers (Previously ONQ), 2013–2014

Head of Technology, Director

Full service Digital Agency in North Melbourne, major clients Adairs, Mattel, Lumo Energy. Acquired Morgan in May 2013.

- Introduced Drupal to the team, upskilling 10 PHP developers over a period of 6 months away from hardcoded from-scratch solutions
- Revolutionised development team practices, including introduction of git, a dev/staging/production deployment cycle, and team wiki for knowledge management
- Consolidated varied and disparate local/server workflows to consistent and reproducible environments, removing dependencies on local workstations allowing remote work
- Provided technical direction for two major eCom rebuild projects, with one turning over more than \$3m in transaction revenue in the 6 months following launch
- Introduced Ruby into the organization for rapid and high quality custom solutions

Morgan, 2008–2013

Technical Director (Director, co-owner)

Small boutique digital development agency started from scratch with cofounder, major clients AMP, Australian Human Rights Commission, Department of Defence. Employed a small team of 5 staff.

- Built business from scratch with cofounder, employed a small team of 5 staff
- Large scale web/mobile project strategy and execution
- Technical consultation and advisement to clients
- Javascript, PHP, Java and Ruby development for specialised solutions
- Designs to functional HTML/CSS in various CMS platforms
- Ongoing client support, bug fixes and change requests
- Sysadmin, infrastructure architecture, deployment and management
- Full business management including account management

Education

Bachelor of Computer Science

University of New South Wales

2010-2011

**Bachelor of Mechatronic Engineer / Bachelor of Commerce
(transferred)**

University of New South Wales

2007-2010

Leisure

I'm obsessed with Snowboarding and I have the travel bug. I enjoy
Bouldering, Skating, and Cycling.

I'm a huge fan of all things tech and web, spending time with friends and
family, a good book, and dreaming of living closer to the Japanese Alps.

I'm a pianist and amateur videographer.
